

Securing your IT assets from the constant barrage of infectious viruses, worms and Trojans, along with, offensive bandwidth-hungry spam is no easy task. Desktop methods still allow these harmful messages into your network resulting in reduced productivity, decreased network capacity, increased pressure on IT staff, and enhanced legal exposure. To date, CentraComm has blocked over eight Billion SPAM for our customers.

## **What's the solution?**

### **CentraSECURE Smart Relay**

An intelligent high performance gateway that stops SPAM and viruses cold, 24 X 7 – hosted in CentraComm's carrier-class datacenter - in front of ANY mail server.

CentraSECURE Smart Relay's advanced multi-layered technology relies on up to 14 different means of identifying and intercepting spam to clean your inbox while protecting you against the counter effects of false positives generated by most other anti-SPAM solutions.

Furthermore, CentraSECURE Smart Relay's SCA (Sequential Content Analyzer) engine, powered by Vircom, is so efficient and accurate that it dramatically reduces the need for custom scripting and system monitoring, allowing your IT and regular employees more time to focus on real business issues.

## **Why Smart Relay?**

**Increases employee productivity** – On average, employees spend 6.5 minutes per day managing SPAM.

**Decreases Network Congestion** – SPAM and viruses slow your Internet connection because of the demand of your bandwidth being tapped to deliver these unsolicited messages.

**Allows IT staff to work on more strategic issues**

**Reduces Legal Exposure** - Pornographic material appears in 1 out of every 5 SPAM

## **Product Specifications**

**Powered by Modus4 multi-layered anti-SPAM technology**—8-layer network-level protection, Customizable attachment blocking, User-level whitelist/blacklist, Content extraction, Body purification, Custom Sieve scripts, Sequential Content Analyzer

### **Installs in front of ANY email server**

- Complete web-based administration console with multi-level delegation at network, domain and user levels
- Adaptive, real-time updated SCA anti-SPAM engine
- Multi-level, sender address-based whitelist/ blacklist
- Custom Sieve scripts layer for engine behavior customization
- 24/7 virus protection and definition updates
- Full support of mailbox aliases
- Trusted Sources feature disables SPAM scanning for specific SMTP- or Pop3-authenticated senders
- 15 SPAM categories for ultimate control
