

323 S. Main St, Findlay, OH

CentraComm is a leading managed IT security and network services provider. We secure, manage, and host high performance IT networks. We serve Fortune 50 customers to mid-market businesses throughout North America while monitoring networks across the globe. We have a strong presence in healthcare, financial, education, energy and manufacturing industries.

CentraComm's network and security solutions are built on our Elite partnership with Juniper Networks and a select offering of best of breed products. We combine this with a 24/7 SOC staffed by engineers who are intimate with the networks they are entrusted to protect.

CentraComm's customers span from Pittsburg to Chicago ranging in size from mid-market companies to enterprise organizations. This includes a top five US provider of hospice care, a top 15 global law firm, an investment firm with \$30B under management, a multi-national tire manufacturer, and Big Ten Universities. We monitor networks worldwide, including China, Mexico, United Kingdom, Ireland, Netherlands, Germany, and the Czech Republic.

What differentiates one MSSP from another?

In our case, a great deal. We stand out because of our depth of experience and service, our state-of-the-art offerings, and our comprehensive approach in ensuring your enterprise security is seamless, airtight, and most of all, manageable. Just ask our customers.

"In all my 14+ years in IT, there has not been a company that I have enjoyed doing business with that has come close to the satisfaction that CentraComm has provided." IT Mgr, Big Ten University

Our client retention rate tops the industry because our unrivalled expertise coupled with our intentionally high service levels set the standard. We provide:

- Full account management team including SOC analysts
- 99% average SLA adherence rate for all SOC customers
- Certified professionals including JNCISs, JNCIAs, CCNA, ECDP and MCPs
- Extensive experience across all industries in regional, national and global environments

Industry Partnerships

CentraComm utilizes best-of-breed network and security solutions. Leading analysts view our partners as leaders in their respective market segments.

Juniper Networks— Network and Security Devices

Websense— Internet Content Filtering

Extreme Networks— Ethernet Switches

Aruba Networks — Wireless Mobility Networking

Aladdin/SafeNet — Two Factor Authentication

F5 — Application Delivery Networking

Kaspersky Lab — Anti-virus protection

Q1 Labs — Security Information & Event Management

Carrier-Class Data Centers

CentraComm's security offerings are enhanced by our ability to leverage our data centers including a carrier-class, nuclear hardened, former defense department facility. Located in Northwest Ohio, our data centers have the benefit of being outside the path of most major weather events. All of our facilities have redundant environmental systems and redundant Fiber Connectivity to AT&T and Time Warner.

Trusted to secure and manage high-performance networks
